FLEXIBLE INTERMEDIATE BULK CONTAINERS – FIBC JUMBO BAGS

Bulk bags, also known as **Flexible Intermediate Bulk Container (FIBC)** or **Jumbo bags**, is an economical and ideal packing medium used for the storage & transportation of powdered, granulated or bulk products.

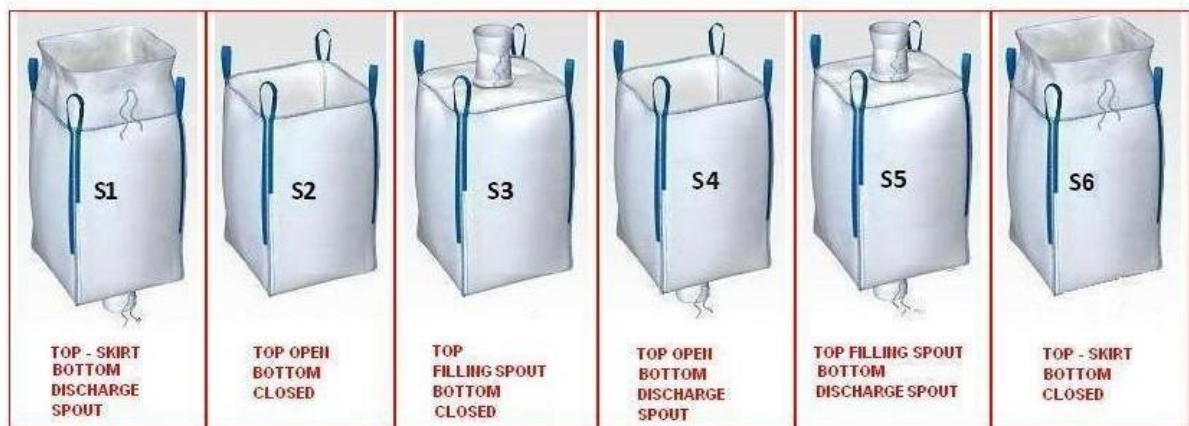

Currently, industries that are using bulk bags are:-

- **Petrochemical & chemical products manufacturers**
- **Food manufacturers (e.g. sugar, flour, spices, wheat, milk powder)**
- **Construction related (e.g. cement, granite, sand, Building and landscaping supplies)**
- **Agricultural related products (e.g. fertilizers, animal feed, and grass)**
- **Industrial applications (e.g. scrap materials, copper coils & slag, sludge waste)**
- **Mining industry supplies**
- **Dangerous goods**
- **Daily produce**
- **Resins and polymers**

FIBC bags are manufactured by polypropylene woven fabrics that are stabilized against UV degradation. Each bulk bag can contain load capacities between 500kgs to 2000kgs with a safety of 5:1 or 6:1 (5:1 is for Single use & 6:1 is for multiple use), depending on the bag design and size. Optional LDPE inner liner can be included to provide additional protection against moisture ingress.

Food Grade Bags: Food grade bulk bags are made with resins meeting FDA standards with the intent of putting food products into the bags. Food grade FIBCs are manufactured and can be certified by a food safety standard like the American Institute of Baking (AIB), Safe Quality Foods (SQF), British Retail Consortium (BRC), etc.

FIBC Standard Design Options:

We provide highly customized solutions for FIBC BAGS to meet your business needs. We have been a preferred & long term supplier to multiple Industrial customers across the globe.
